EDUCATION

Doctor of Philosophy in Planetary Science , <i>California Institute of Technology</i>	Jun 2022 (expected)
Master of Science in Geophysics , <i>California Institute of Technology</i>	Jun 2019
Master of Science in Earthquake Engineering , <i>Universidad de Chile</i>	Mar 2016
Bachelor of Science in Civil Engineering , <i>Universidad de Chile</i>	Dec 2013

RESEARCH EXPERIENCE

Interiors Working Group / NASA's Juno mission Jan 2020 — Present
California Institute of Technology Pasadena, CA

- Interpreted data from the Juno mission to recognize the first direct evidence of dynamical tides in a gas giant planet.
- Revealed the gyrotidal effect that amplifies tides and reduces the attenuation of tesseral tidal torques.
- Interpreted data from the Juno mission to propose an interior–orbital resonance between Jupiter and the satellite Io.

Graduate Research Associate / The 2019 Ridgecrest earthquake Jul 2019 — Dec 2019
California Institute of Technology Pasadena, CA

- Collaborated in the first peer-reviewed account of the 2019 Ridgecrest earthquake that struck California after 20 years of seismic quiescence.
- Trained a high dimensional fault slip model from spaceborne radar observations using Markov Chain Monte Carlo sampling and High Performance Computing.

Graduate Research Associate / The Earthquake Mechanics of Geological Faults Jun 2017 — Jun 2019
California Institute of Technology Pasadena, CA

- Implemented tectonic fault damage as a new feature in an earthquake simulator to numerically simulate the tectonic activity of a fault model over millions of years.
- Provided an explanation to earthquake pulses based on mathematical models and numerical simulations of earthquakes under the conditions observed in geological faults.

Science Crew / Marcus G. Langseth Research Vessel Mar 2018
California Institute of Technology Puysegur Trench, New Zealand

- Assisted the deployment of instrumentation and acquisition of seismic, magnetic, and radar data while sailing the Pacific Ocean.

Research Assistant / Chilean Earthquake Ground Motion Mar 2016 — Jun 2017
Universidad de Chile Santiago, Chile

- Trained a linear model of the ground motion perceived during destructive earthquakes in Chile using local data, leading to a Ground-Motion Prediction Equation that is frequently used in seismic hazard studies in the area.

OUTREACH AND SERVICE

Speaker at the Urban Math Collaborative program, Long Beach Unified School District	2021
Host in Caltech's <i>Astronomía en el Bar</i> (Astronomy on tap hosted in Spanish), virtual (available at youtube.com/c/CaltechAstro)	2021
Mentor for Caltech's International Student Buddy Program	2020 — 2021
Speaker at Caltech's Science Journeys (English and Spanish)	2020 — 2021
Judge for Caltech's Summer Undergraduate Research Fellow (SURF) poster competition	2020 — 2021
Caltech's Science for March, Seismological Laboratory booth	2018
Graduate Student Council Representative, Universidad de Chile	Jan 2013 — Dec 2014

HONORS AND AWARDS

Affiliate to the Keck Institute for Space Studies	Nov 2019 — Present
Division of Geological and Planetary Sciences Fellowship, California Institute of Technology	Jun 2017 — Sep 2018
Highest Distinction Major Graduate, Universidad de Chile	Mar 2016
CONICYT Master of Science Fellowship, Chile	Mar 2014 — Dec 2015
Honored Undergraduate Student, Universidad de Chile	2011 — 2012

CONFERENCE PRESENTATIONS

- (Poster) Tidal constraints on the radial extension and static stability of Jupiter's dilute core, AGU Fall Meeting, New Orleans, 2021.
- (Poster) Dynamical tides in the Jovian System as revealed by Juno, AGU Fall Meeting, Virtual, 2020.
- (Poster) The first few days of the 2019 Ridgecrest earthquake sequence, SCEC Annual Meeting, Palm Springs, 2019.
- (Talk) A Bayesian Image of the 2017 Kermanshah Seismic Sequence in the Northwestern Zagros, AGU Fall Meeting, Washington DC, 2018.
- (Poster) Rupture complexity promoted by damaged fault zones, AGU Fall Meeting, New Orleans, 2017.
- (Talk) Empirical dynamic amplification factors for sites based on seismic noise, 16th World Conference on Earthquake Engineering, Santiago, Chile, 2017.
- (Poster) Ground motion prediction equations for the Chilean subduction zone, 2nd Geophysical Signatures of Earthquakes and Volcanoes - 2GSEV, Santiago, Chile, 2016.

INVITED TALKS AND SEMINARS

- Tides in Jupiter, Report #3, Interiors Working Group, NASA's Juno mission, 2021.
- Journey to the center of Jupiter, Science Journeys, Caltech, 2021.
- The tidal excitation of Jupiter's dilute core, Planetary Science Seminar, Caltech, 2021.
- Dynamical tides in the Jovian System as revealed by Juno, Planetary Science Seminar, Caltech, 2020.
- Tides in Jupiter, Reports #1 & #2, Interiors Working Group, NASA's Juno mission, 2020.
- Simple Estimates for the dynamical contribution to tidal gravity, Interiors Working Group, NASA's Juno mission, 2020.

TEACHING ASSISTANT

California Institute of Technology

Planetary Physics (Konstantin Batygin)	2022
Planetary Structure and Evolution (David Stevenson)	2021
Geodynamics (Michael Gurnis)	2020
Freshman Seminar: Earthquakes (Joann Stock)	2019

Universidad de Chile

Advanced Structural Dynamics (Ruben Boroscchek)	2015
Seismic Design of Structures (Ruben Boroscchek)	2015

APPEARENCES IN NEWS ARTICLES

The tides of Jupiter can help scientists understand the history of the Solar System, <i>Passant Rabie</i> , <i>Inverse Magazine</i>	May 5, 2021
Raising Tides on Jupiter with Its Moons, <i>Susanna Kohler</i> , <i>AAS Nova</i>	Apr 21, 2021
Lessons from Ridgecrest, <i>Robert Perkins</i> , <i>AAAS EurekAlert!</i>	Oct 17, 2019
Unprecedented movement detected on California earthquake fault capable of 8.0 temblor, <i>Rong-Gong Lin II</i> , <i>LA Times</i>	Oct 17, 2019
Se detecta movimiento sin precedentes en una falla sísmica en California capaz de producir un temblor de 8.0, <i>Rong-Gong Lin II</i> , <i>The San Diego Union-Tribune En Español</i>	Oct 17, 2019
